

Velocity Hospital's Laparoscopic Surgery department offers minimally invasive procedures to examine abdominal organs, resulting in less pain and quicker recovery. Benefits include small incisions, high-resolution images, minimal pain and blood loss, quick healing, and possible same-day discharge. Services include hernia surgery, appendectomy, anti-reflux surgery, and gallbladder removal. The department is led by Dr. Rinkan Virani, a Consultant General & Laparoscopic Surgeon, dedicated to providing high-quality care to patients. Velocity Hospital ensures the best possible treatment and care in general and laparoscopic surgery.
