Health Checkup in Surat . At Velocity Hospital, we understand the importance of comprehensive health checkups to  
monitor your well-being and detect potential health issues at an early stage. Our Full Body Health Checkup program is  
designed to provide you with a detailed assessment of your overall health, helping you make informed decisions about  
your lifestyle and preventive healthcare. We have wide varieties of Health Checkup plans for Health checkup package  
for men & women, health checkup package in surat.Our dedicated team of experienced healthcare professionals and  
state-of-the-art facilities ensure that you receive the highest standard of care throughout the checkup process. We offer  
a wide range of diagnostic tests and screenings to evaluate various aspects of your health, including but not limited  
to:General Physical Examination: A thorough examination to assess your overall physical health, including  
measurements of blood pressure, heart rate, and body mass index (BMI).Blood Tests: Comprehensive blood tests to  
analyze your cholesterol levels, blood sugar, liver and kidney function, thyroid hormones, and complete blood count  
(CBC). These tests help identify any underlying medical conditions.Imaging Studies: Advanced imaging techniques such  
as X-rays, ultrasound, and MRI scans are used to evaluate the condition of your organs, bones, and soft tissues,  
providing valuable insights into your health.Cardiac Assessment: Specialized tests like electrocardiogram (ECG) and  
stress tests are performed to assess your heart’s function, detect any abnormalities, and evaluate your  
cardiovascular health.Pulmonary Function Tests: These tests assess the functioning of your lungs and help identify any  
respiratory disorders or conditions such as asthma or chronic obstructive pulmonary disease (COPD).Cancer Screening:  
Our health checkup includes screenings for common types of cancer, such as breast, cervical, and prostate cancer,  
depending on your age and gender. Early detection is key to successful treatment.Bone Density Scan: A non-invasive  
test to measure the density of your bones, helping identify osteoporosis or other bone-related conditions.Consultations:  
You will have the opportunity to consult with our experienced physicians who will provide personalized  
recommendations based on your health assessment results.Upon completion of the Full Body Health Checkup, you will  
receive a comprehensive report that outlines your test results and provides recommendations for maintaining or  
improving your health. Our aim is to empower you with the information you need to take control of your well-being.At

Neurology . Neurology . Neurology is the specialty dealing with managing diseases affecting the brain, spinal cord,  
peripheral nerves and muscles. Neurological problems manifests as any aberrations in activities of daily living like  
inability to do the day to day chores of life like speaking, walking, seeing or drinking and in certain situations even  
thinking. Some of the neurological problems force a person to leave his work. A number of these are treated if  
consulted early. The department of Neurology at Velocity Hospital is highly skilled department of adult  
and paediatric neurologists in Surat who specialize in diagnosis and treatment of all the conditions and diseases  
affecting the nervous system. The department works very closely with all the other departments related to neurology.  
Our department of neurology is led by one of the top neurologists in Surat. We have a team of doctors who are  
experienced & specialized in this area. . Dr Prayag Makwana Consultant Neurophysician. Neurology. . Departments .

Neurosurgery . Neurosurgery . At the department of Neurosurgery at Velocity Hospital, neurosurgeons are trained in  
brain and nervous system surgery in order to treat people with brain and nervous system (neurologic) conditions.  
Neurological surgery is a special medical branch that is solely concerned with the prevention, diagnosis, treatment, and  
recuperation of conditions that affect any portion of the nervous system such as the brain, spinal cord, peripheral  
nerves, and extra-cranial cerebrovascular system.The team of surgeons includes internationally reputed experts, who  
are deft at providing innovative and the most modern surgical treatment and management services for all sorts of  
disorders of the nervous system. Our team of surgeons and neurological specialists are trained from top universities  
and they aim to provide advanced clinical care focusing on using minimally invasive techniques to treat the patients.  
The hospital is committed to improve and research the latest therapies used to treat neuron disorders in patients  
suffering from this disease.The department performs over 1000 procedures each year. We have a dedicated team of  
surgeons who have undergone training from the top-class faculty of reputed institutions. With an established and well-  
equipped lab, with the latest technological equipment for the diagnosis and treatment of patients we aim to provide the  
best care in India.The neurosurgery division is equipped with dedicated state-of-art operating rooms with good  
infrastructure, exclusive intensive surgical wards and has established a rehabilitation center for post-operative patient  
care. Every test and procedure performed is well organized and the results are accurate; it is the togetherness of the  
team that brings out great results. . Treatments . Brain tumour. . Cerebral Aneurysm. . Movement disorders. .

Home -Nutrition and Dietetics . Nutrition & Dietetics . Nutrition plays a key role in the treatment and management of diseases, either critical illness (ICU/CCU/NICU) or other conditions such as Diabetic mellitus, Hypotension, Cardiac, obesity etc.Department of Dietetics & Nutrition is functional in the hospital from commencement of hospital services. Good nutrition is vital for good health, disease prevention and essential for healthy growth. Department makes systematic efforts to provide with quality diet to all IPD. OPD consultation is provided by Consultant/Nutritionist/Dietician. Department offers RD (Registered Dietician) internship.Out Patient Services-:Â Dietary department has an active OPD consultation schedule and offers professional services. Outpatients are referred either from other speciality consultant or walk-in patients seeking nutritional advice.In patient services -: Every in-patient receives a visit from the dietician, where patients receive food from hospital or utilizing hospital catering services. The dietician ensure clinical needs with the treating doctor and the patient/patients relatives after taking into consideration their food habits. Therefore, nutritional therapy is planned and provided in a collaborate manner. . Departments . Anesthesia. . Arthroscopy & Sports Medicine. . Critical Care & Emergency Medicine. . General & Laparoscopic Surgery . Home -General & Laparoscopic Surgery . General & Laparoscopic Surgery . Laparoscopic surgery, also called diagnostic laparoscopic surgery, is a method to examine the organs inside the abdomen.It is a minimally invasive surgery and a low-risk surgery that only requires small incisions to perform the surgery. Through these small incisions, a surgeon can examine and look at the organs by using a device called a laparoscope.The first thing that comes in our mind after hearing the word surgery is pain, blood and wounds. But, don’t worry, not all the surgeries are painful and involves blood loss. Thanks to the advancement in the medical science that laparoscopy surgeries came in.During a laparoscopy surgery, a surgeon makes a small incision near the belly button. Through this incision, he inserts a laparoscope, with the help of which high-resolution images can be seen on the video monitor. The incisions made cause no pain and very less blood loss. The images that are formed helps a surgeon to know about the exact underlying problem.Laparoscopy has many benefits over open surgery in cases like splenectomy, cholecystectomy and esophageal surgery. It is a completely safe and quick surgery in which deep tissue heals within two months. The patient gets discharged on the same day sometimes and even the scars heal quickly. .
